Attachments: Methanol FR notice 03-25-11 v2.doc

I reviewed it. The only things I noted were the two references to formaldehyde.

Whoops - I had a version mix up. Here's the formaldehyde-free version. It's the same except for switching FA for MeOH.

Norm:

I have comments on a hardcopy that I will give to you (thanks in advance for being editor in chief). As for the new text that has been added, better check for the word "formaldehyde"---it slipped in....

And then no more comments from me! This one is a hard one because it is so different from the others!

Subject: methanol FRN - updated for listening session, still needs Lynn's comments

Since we now have some more time on the methanol FRN, I made some edits to include the listening session information and notice that the participant list and presentations will be made a part of the public record. I think this is only missing the edits that Lynn said she wanted to make. The recent changes are shown in redline.

Thanks
